INTRODUCTION⁺

Here you could give a brief description of the topic you want to talk about. For example, if you want to talk about Mercury, you could say that it's the smallest planet in the entire Solar System

+ EARTH, SUN & MOON

EARTH

Earth is the only planet that harbors life in the Solar System. This is where we all live on

SUN

It's the star at the center of the Solar System, but without its energy we would not exist

MOON

The Moon is a natural satellite of the Earth, meaning that it orbits around the Earth

⁺WHAT IS THIS TOPIC ABOUT?

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous
